

Jan Hubička

Work Address

Univerzita Karlova v Praze
Department of Applied Mathematics
Malostranské nám. 25
118 00 Praha 1
Czech Republic

Permanent Address

Dukelských bojovníků 1944
390 03 Tábor
Czech Republic
Phone: +420 776 812 650
Email: hubicka@ucw.cz

Born April 1, 1978 in Tábor, Czech Republic

Education

PhD Degree in Computer Science 2002–2010

Faculty of Mathematics and Physics, Charles University in Prague
Thesis: *Combinatorial Properties of Finite Models*, advisor Jaroslav Nešetřil

Master Degree in Computer Science 1997–2002

Faculty of Mathematics and Physics, Charles University in Prague
Thesis: *Ramsey Properties of Universal Sets*, advisor Jaroslav Nešetřil

Employment history

Department of Applied Mathematics, Prague since June 2017
Assistant Professor

SUSE ČR s.r.o, Prague since 2016
Senior manager

Computer Science Institute, Charles University, Prague since 2012
Researcher

University of Calgary, Calgary 2014–2015
PIMS Postdoctoral Fellow

SUSE ČR s.r.o, Prague 2000–2013
Senior software developer

Institute of Theoretical Computer Science, Charles University, Prague 2003–2013 and since 2016
Researcher

Publications

Papers published in refereed international journals

1. J. Hubička, J. Nešetřil: Bowtie-free graphs have a Ramsey lift, *Advances in Applied Mathematics* 96 (2018), 286–311.
2. J. Fiala, J. Hubička, J. Nešetřil, Y. Long: Fractal property of the graph homomorphism order, *European Journal of Combinatorics* 66 (2017), 101–109.
3. J. Hubička, J. Nešetřil: Homomorphism and embedding universal structures for restricted classes, *Journal of Multiple-Valued Logic and Soft Computing* 27 (2–3) (2016), 229–253.
4. D. Hartman, J. Hubička, J. Nešetřil: Complexities of relational structures, *Mathematica Slovaca* 65 (2) (2015), 229–246.
5. D. Hartman, J. Hubička, D. Mašulovič: Homomorphism-homogeneous L -colored graphs, *European Journal of Combinatorics* 35 (2014), 313–323.

6. J. Fiala, J. Hubička, Y. Long: Universality of intervals of line graph order, *European Journal of Combinatorics* 41 (2014), 221–231.
7. J. Hubička, J. Jost, Y. Long, P. F. Stadler, L. Yang: Relations between graphs, *Ars Mathematica Contemporanea* 6 (2) (2012), 323–250.
8. J. Hubička, J. Nešetřil: A finite presentation of the rational Urysohn Space, *Topology and its Applications* 155 (14) (2008), 1483–1492.
9. J. Hubička, J. Nešetřil: Universal partial order represented by means of oriented trees and other simple graphs, *European Journal of Combinatorics* 26 (2005), 765–778.
10. J. Hubička, J. Nešetřil: Finite presentation of homogeneous graphs, posets and Ramsey classes, *Israel Journal of Mathematics* 149 (2005), 21–44.
11. J. Hubička, J. Nešetřil: Finite paths are universal, *Order* 21 (2004), 181–200, and, *Order* 22 (2005), 21–40.

Book Chapters (refereed)

12. J. Hubička, J. Nešetřil: Ramsey classes with closure operations (selected combinatorial applications), *Connections in Discrete Mathematics: A Celebration of the Work of Ron Graham* (2018).
13. J. Hubička, J. Nešetřil: Universal structures with forbidden homomorphisms, *Logic Without Borders: Essays on Set Theory, Model Theory, Philosophical Logic and Philosophy of Mathematics* (2015), 241–264.
14. J. Hubička, J. Nešetřil: Some examples of universal and generic partial orders, *Model Theoretic Methods in Finite Combinatorics: AMS-ASL Special Session, 2009*, 293–318.

Papers accepted to refereed international journals

15. J. Hubička, M. Konečný, J. Nešetřil: Conant’s generalised metric spaces are Ramsey, accepted to *Contributions to Discrete Mathematics*, arXiv:1710.04690, 2017, 20 pages.

Papers accepted to international conferences

16. A Aranda, J. Hubička, E. K. Hng, M. Karamanlis, M. Kompatscher, M. Konečný, M. Pawliuk, D. Bradley-Williams: Completing graphs to metric spaces (extended abstract), *Eurocomb 2017*, *Electronic Notes in Discrete Mathematics* 61(2017), 53–60.
17. J. Hubička, J. Nešetřil: Ramsey theorem for designs (extended abstract), *Eurocomb 2017*, *Electronic Notes in Discrete Mathematics* 61(2017), 623–629.
18. J. Fiala, J. Hubička, Y. Long: Gaps in full homomorphism order (extended abstract), *Eurocomb 2017*, *Electronic Notes in Discrete Mathematics* 61(2017), 429–435.
19. J. Fiala, J. Hubička, Y. Long: An universality argument for graph homomorphisms (extended abstract), *Eurocomb 2015*, *Electronic Notes in Discrete Mathematics* 49(2015), 643–649.
20. J. Hubička, J. Nešetřil: Ramsey classes with forbidden homomorphisms and a closure, *Eurocomb 2015*, *Electronic Notes in Discrete Mathematics* 49(2015), 737–745
21. D. Hartman, J. Hubička, J. Nešetřil: Towards bounds of relational complexity (extended abstract), *Bordeaux Graph Workshop*, 2014, 17–18.
22. D. Hartman, J. Hubička, J. Nešetřil: Combinatorial bounds on relational complexity (extended abstract), *The Seventh European Conference on Combinatorics, Graph Theory and Applications*, *CRM Series* 16 (2013), 573–578.
23. J. Hubička, T. Glek: Optimizing real world applications with GCC Link-Time Optimization. *GCC Developers’ Summit Proceedings 2010*, 25–46.
24. J. Hubička: Interprocedural optimization framework in GCC. *GCC Developers’ Summit Proceedings 2007*, 59–68.

25. J. Hubička: Interprocedural optimization on function local SSA form. GCC Developers' Summit Proceedings 2006, 75–84.
26. J. Hubička: Profile driven optimizations in GCC. GCC Developers' Summit Proceedings 2005, 107–124.
27. J. Hubička, Z. Kovács, Z. Kovács: Visualizations on the complex plane, Computer algebra systems and dynamic geometry systems in mathematics teaching, Proceedings of “Sprout-Selecting” Conference, 12-27, 2004.
28. J. Hubička: Call graph module in GCC. GCC Developers' Summit Proceedings 2004, 64–78.
29. J. Hubička: Porting GCC to the AMD64 architecture. GCC Developers' Summit Proceedings 2003, 79–106.

Theses

30. J. Hubička, Combinatorial Properties of Finite Models, dissertation thesis, 2010.
31. J. Hubička, Ramsey Properties of Universal Sets (in Czech), diploma thesis, Charles University 2002.

Other publications (selected)

32. J. Hubička, Odhad kvality fotografických materiálů a metody jejich digitalizace (in Czech), Zprávy památkové péče, National Heritage Institute, 1/2016.
33. J. Hubička, Digitizing historical photographs at Šechtl and Voseček Musuem of Photography (in Czech), Digitalizace aneb konec oslích uší, National Library, Prague, 2010.
34. J. Hubička, Šechtl and Voseček Studios (in Czech), Historická fotografie, 2007.
35. Z. Dvořák, J. Hubička, P. Nejedlý and J. Zlomek: Infrastructure for Profile Driven Optimizations in GCC Compiler, project report, 2003.
36. H.J. Lu, M. Matz, J. Hubička, A. Jaeger, M. Mitchel (ed.): System V Application Binary. Interface. x86-64 Architecture Processor Supplement, 2000–2007. (Original author of specification of low-level datastructure layout and function call conventions.)

Submitted

37. D. Evans, J. Hubička, J. Nešetřil: Automorphism groups and Ramsey properties of sparse graphs, arXiv preprint arXiv:1801.01165, 2018, 57 pages.
38. A Aranda, J. Hubička, M. Karamanlis, M. Kompatscher, M. Konečný, M. Pawliuk, D. Bradley-Williams: Ramsey expansions of metrically homogeneous graphs, arXiv:1707.02612, 2017, 56 pages.
39. D. Evans, J. Hubička, J. Nešetřil: Ramsey properties and extending partial automorphisms for classes of finite structures, arXiv:1705.02379, 2017, 33 pages.
40. A Aranda, J. Hubička, E. K. Hng, M. Karamanlis, M. Kompatscher, M. Konečný, M. Pawliuk, D. Bradley-Williams: Completing graphs to metric spaces, submitted to Contributions in Discrete Mathematics, 2017, 19 pages.
41. J. Hubička, J. Nešetřil: All those Ramsey classes: Ramsey classes with closures and forbidden homomorphisms, submitted to Advances in Mathematics, arXiv:1606.07979, 2016, 59 pages.

In final stages of preparation

42. J. Hubička, M. Konečný, J. Nešetřil: Semigroup-valued metric spaces: Ramsey expansions and EPPA, 20 pages.
43. J. Fiala, J. Hubička, Y. Long: Constrained homomorphism orders, 31 pages.
44. M. Novák, J. Hubička, P. Šemíková, B. Martínková: Možnosti restaurování a digitalizace historických fotografických a kinematografických materiálů, nasnímaných v letech 1930 – 2000 na barevné inverzní originály Kodachrome (in Czech), 67 pages.
45. J. Hubička, M. Jambor: Optimization of polymorphic calls in modern C++ programs, 12 pages.

Teaching experience

1. Linear Algebra, Charles University, Prague, 2017-2018
2. Algorithms and Data Structures, Charles University, Prague, 2017-2018
3. Advanced code optimization techniques used in industrial strength compilers, 2017-2018
4. Teaching assistant of Discrete Mathematics, Charles University, Prague, 2017
5. Co-lecturer of Selected topics in Combinatorics I,II (with J. Nešetřil), Charles University, Prague, 2015–2018
6. Lecturer of Math 311 — Linear Methods II, University of Calgary, 2015
7. Lecturer of Math 211 — Linear Methods I, University of Calgary, 2014
8. Lecturer of Advanced code optimization techniques used in industrial strength compilers, Charles University, Prague, 2008–2013
9. Lecturer of seminar Advanced code optimization techniques used in industrial strength compilers, Charles University, Prague, 2003–2008
10. Lecturer of workshop Digitalizace fotografií, National Technical Museum, Prague, 2009
11. Teaching assistant of Algorithms, Charles University, Prague, 2004–2007, 2009
12. Teaching assistant of Discrete Mathematics, Charles University, Prague, 2002–2004

Master degree students

1. Martin Jambor: Optimizations in the GNU Compiler Collection targeted at scientific computing, 2005–2007
2. Ondřej Bílka: Pattern Matching in Compilers, 2011–2012
3. Martin Liška: Optimizing large applications, 2012–2013
4. Ladislav Láška: Scalable link-time optimization, 2015–2017

Current students

1. Matěj Konečný: Combinatorial Properties of Metrically Homogeneous Graphs, bachelor student, 2018-present
2. Ondřej Bílka: Optimizing dynamic and functional languages, doctoral student, 2013–present

Organization of conferences and service to community

1. Main organizer of workshops “GNU Tools Cauldron”, Charles University, Prague, 2012, 2015, 2017
2. Ramsey DocCourse Prague 2016 (co-organized with J. Nešetřil), Charles University, Prague, 2016
3. Co-organizer of workshops “GNU Tools Cauldron”, 2013 (Google Headquarters, Mountain View), 2014 (Cambridge), 2016 (Hedben Bridge)
4. Workshop “Space, Color”, Motion, National Technical Museum Prague, 2013
5. Workshop “Legacy of three color photography”, National Technical Museum, Prague, 2008

Membership in program committees

1. Midsummer Combinatorial Workshop, Charles University, Prague, 2017
2. Workshop “GNU Tools Cauldron”, Charles University, Prague, 2012-2017
3. Ramsey DocCourse Prague 2016, Charles University, Prague, Oct–Dec 2016, March 2017
4. Workshop “Space, Color, Motion”, National Technical Museum, Prague, 2013
5. Workshop “GROW 2011: 3rd International Workshop on GCC Research Opportunities”, CGO, Chamonix 2011
6. Workshop “2nd International Workshop on GCC Research Opportunities”, HiPEAC 2010, Pisa, 2010
7. Workshop “GCC Research Opportunities, 4th International Conference on High-Performance Embedded Architectures and Compilers”, HiPEAC, Paphos, 2009
8. Workshop “Legacy of three color photography”, National Technical Museum, Prague, 2008
9. Workshop “GREPS: International Workshop on GCC for Research in Embedded and Parallel Systems, 16th International Conference on Parallel Architectures and Compilation Techniques”, PACT, Brasov, 2007

Awards and grants

1. GaČR junior grant (Model theory and extremal combinatorics), 2018–2020
2. IBM Faculty Award 2015
3. PIMS Postdoctoral Fellowship, 2014–2015

Participation in research networks

1. STRUCO (Structures in Combinatorics), associated International Laboratory of CNRS between DIMATIA, Prague, and LIAFA, Paris, since 2012
2. HiPEAC (European Network on High Performance and Embedded Architecture and Compilation), since 2009
3. COMBSTRU (Combinatorial Structure of Intractable Problems), 2002–2006

Lectures (selected, invited lectures emphasized)

1. *Ramsey theorems for classes of structures with functions and relations*. Model Theory and Combinatorics, Paris 2018.
2. *Ramsey properties of Hrushovski construction*. Zámeček, Hraniční zámeček 2017.
3. *Ramsey theorem for designs*. European Conference on Combinatorics, Graph Theory and Applications, Vienna 2017.
4. *On the existence of Ramsey expansions*. Beauty of Discrete Mathematics, Montreal 2017.
5. *Automorphism Groups and Ramsey Properties of Sparse Graphs*, Workshop on Metafinite Model Theory and Definability and Complexity of Numeric Graph Parameters, Rejkjavik 2017
6. *Ramsey properties of Hrushovski construction*.
7. *Very sparse graphs are Ramsey*, Czech-Slovak Conference on Combinatorics and Graph Theory, Hejnice 2017 The British Postgraduate Model Theory Conference, Leeds 2017
8. Series of 5 lectures at Ramsey DocCourse Prague 2016, Charles University, Prague, September 15 – December 31, 2016
9. *All those Ramsey classes (Ramsey classes with closures and forbidden homomorphisms)*. Logic Colloquium, Leeds 2016.
10. Porting GCC to AMD GCN microarchitecture. GNU Tools Cauldron, Hedben Bridge, 2016
11. *Porting GCC to AMD GCN microarchitecture*. SUSElabs conference, Mikulov, 2016

12. *Ramsey Classes by Partite Construction*. 2 lectures. Permutation Groups and Transformation Semigroups, EPSRC Durham Symposium, 2015
13. *An universality argument for graph homomorphisms*. Eurocomb, 2015
14. *Ramsey classes with forbidden homomorphisms and a closure*. Eurocomb, 2015
15. *Ramsey classes with forbidden homomorphisms and a closure*. Shanghai Jiao Tong University, 2015
16. Ramsey lifts of classes of intersection graphs. CanaDAM, 2015
17. *Ramsey classes with algebraic closure and forbidden homomorphisms*. Logic Seminar, University of Illinois at Urbana-Champaign, 2015
18. *Examples of Ramsey lifts*. Combinatorial Seminar, University of Illinois at Urbana-Champaign, 2015
19. Types and type based optimizations in GCC. GNU Tools Cauldron, Charles University, Prague 2015
20. *Multiamalgamation classes are Ramsey*. Homogeneous Structures, Banff 2015
21. *Ramsey classes—properties, examples and constructions*. Combinatorial seminar, Iowa State University 2015
22. Devirtualization in GCC, GNU Tools Cauldron, Cambridge, 2014
23. *Interprocedural and link-time optimization in GCC*. IBM Colloquia, New York, 2014
24. *Ramsey classes with algebraical closure and forbidden homomorphisms*. Algebraic and Model Theoretical Methods in Constraint Satisfaction, Banff, 2014
25. Collection of Finlay-Color negatives from the American Colony in Jerusalem. Space, Color, Motion, National Technical Museum, Prague, 2013
26. *Combinatorial bounds on relational complexity*. Eurocomb, Pisa, 2013
27. *Ramsey expansions of classes with non-trivial algebraic closure*, Descriptive Set Theory Seminar, Rutgers, 2014
28. *Bowtie-free graphs have Ramsey lift*. Universality and Homogeneity Hausdorff Trimester Program, Bonn, 2013
29. Constrained homomorphism orders. ČS Grafy, Litomyšl, 2012
30. Constrained homomorphism orders. Shanghai Conference on Algebraic Combinatorics, Shanghai, 2012
31. *Locally injective homomorphisms are universal*. 2nd Workshop on Homogeneous Structures, Charles University, Prague, 2012
32. Constrained homomorphism orders. Bordeaux Graph Workshop, Bordeaux, 2012
33. Link time optimization in GCC. OpenSUSE conference, Nuernberg, 2011
34. *Explicit construction of universal structures as shadows of ultrahomogeneous structures*. LMS Northern Regional Meeting and Workshop on Homogeneous Structures, Leeds 2011
35. Digital processing of early color photography. OpenSUSE conference, Nuernberg, 2011
36. *Digitální zpracování Ranné barvné fotografie*. Archivy, knihovny a muzea v digitálním světě, 2011
37. Optimizing real world applications with GCC Link Time Optimization. GCC Summit, Ottawa, 2010
38. Some examples of universal and generic partial orders. Young Researchers Forum, MFCS, 2010
39. Universal structures as shadows of ultrahomogeneous structures. Fete of Combinatorics and Computer Science 2009, Keszthely, Hungary
40. *Digitizing Historical Negatives*. 9. konference Archivy, knihovny, muzea v digitálním světě. Selected as the best presentation of the conference, National Archive, Prague, 2008
41. *Digitalizace fotografických předloh*, digitalizace fotografií, National Technical Museum, Prague 2008
42. *Interprocedural Optimization Framework*. Gelato ICE Conference & Expo, San Jose, California , 2007
43. Interprocedural optimization framework in GCC. GCC Summit, Ottawa, 2007

44. Interprocedural optimization on function local SSA form in GCC. GCC Summit, Ottawa, 2006
45. *Profile Driven Optimizations in GCC*. Gelato GCC on Itanium Improvement Workshop, Russian Academy of Sciences, Moscow, 2006
46. *Finite Paths are Universal*. COMBSTRU final workshop, Barcelona, 2006
47. Preparing of Albumen Paper. Historické fotografické techniky/Edeldrucke, Jindřichův Hradec, 2006
48. Profile driven optimizations in GCC. GCC Summit, Ottawa, 2005
49. Call graph module in GCC (framework for intraprocedural optimization). GCC Summit, Ottawa, 2004
50. x86-64 support in GCC. GCC Summit, Ottawa, 2003

Software projects (selected)

1. Port of AMD GCN architecture, since 2016
2. Incremental scalable link time optimization framework in GCC, since 2009
3. Interprocedural optimization framework in GCC, since 2004
4. Port of GCC to x86-64 architecture, Architecture Binary Interface design, since 2000
5. Profile driven optimizations in GCC, 1998–2003
6. GNU Compiler Collection (GCC) i386 backend improvements, 1997–2000
7. AA-project (ASCII art library and tools), 1997–2000
8. XaoS (realtime fractal zoomer), 1995–1999
9. Koules (game), 1993–1995

Other activities

Digitization of archive Šechtl and Voseček since 2004
 Software, web pages, historical research, co-authoring texts for exhibitions, preparing digital prints from historical negatives and cooperating on preparing the exhibitions

Co-maintainer of GNU Compiler Collection since 2001
 Maintainer of inter-procedural optimization framework, profile feedback optimization framework and x86 backend
